Valois,

That is correct. Went sent you a letter a few years ago that where we committed to installing a cistern which was completed. Further, to that we also provided a well rehabilitation record showing certification that well 16 had been completely disconnected from the house. All uses of the water in the house is from the cistern to which water is hauled or from bottled water.

John

Subject: some questions about the residence at well 16 in Section 1

Hi John,

We had a call with the Office of General Council from our headquarters office yesterday. I recall that the house is used just on a temporary basis now, I think during hunting season?

I know Powertech is providing drinking water for the residents when they are there. Did you say something about a cistern at the site that Powertech hauls water to fill? I thought I recalled something about that. Is there is water for showers, sinks and toilets from the cistern? I was asked that question during the call.

Thanks!

Valois
